A Shift to Contribution New Opportunities to Help

Team 7157 among other FIRST Robotics teams had to stop their season after the first regional they attended due to COVID-19, but the team's hard work never ended! They've been busy assembling protective face shields to help protect doctors and nurses at local hospitals. They've produced approximately 2500 masks over the course of the last few months!

Moving Forward!

A New Leadership Team

As last year's leadership team has now graduated, the younger members of the team have gladly taken their new positions and responsibilities. A communicative and cooperative leadership panel is crucial to a team's success; there is no doubt that the team will continue to have solid leadership to guide them through the exciting challenges of the seasons to come.

2020-2021 Leadership Team:

President – Clara

Build – Kennedy

Programming – Veronica

Business – Elin

Electrical – Lauren

Safety/Logistics – Joey

Design - Jonathan

Congratulations!

Attention Students!

How do **YOU** feel about the 2020 robotics season?
