

-- FRC Team 7157 -- 2020 INFINITE RECHARGE -- Issue #11 -- 10/28/2020 ---

Up & Running!

Team 7157 is in order!

With the gradual opening of schools and opportunities to meet and grow as a team, μbotics is making progress to get ahead! The business and programming team is practicing, learning, and preparing for the next season to come, whenever it may be. They're making great use of their time to get ahead with their priorities, further opening opportunities for later in the year!

The following are events that Team 7157 hopes to participate in:

1. Game Design Challenges
2. Infinite Recharge at Home
3. FIRST Innovation Challenge
4. Chairman's Award Competition
5. Beach Blitz
6. Team Halloween Party @ 5-9 PM
259 Winding Brea -- Saturday 10/31

Business Team:

Sponsors and Grants!

Team 7157's business team is writing with determination to sponsors with hopes of receiving grants and funding for the promising season ahead. These grants are what make the team's hopes and ambitions possible throughout the year; every member of the team is extremely thankful for any contribution the team can get! Atop this, Team 7157 is assisting the new Westminster team: CyberLions!

Returning mentor, Danny Yoo, and a portion of the Programming Team, including lead, Veronica.

Programming Team:

Training the Developers!

Team 7157's programming lead is wisely training the team to work with all of the FRC terminology and technical components that make a robot functional. Taking time to define these ideas early on is a great decision made by the lead! By competition time, everyone will be ready to go!
