

More Face Shields!

Team 7157 taking cover!

As the COVID-19 cases in Orange County unfortunately rise, Team 7157 is making sure to do their part by initiating another round of face shields. They continue to stay inspired to achieve their goal of making a total of 7157 face shields for local hospital faculty! While making such progress, they also make sure to follow COVID-19 regulations as they are released.

The following are Team 7157's plans:

1. Completely understanding every part of the robots
2. Preparation for virtual Season Kickoff w/ Challenge-oriented competition
3. Holiday Community Event
4. Building Face Shields
5. Team Training
6. Apply for Grants!

Business Team: Holiday Plans!

Team 7157 is planning on a festive holiday community event leading up to the holidays, as their Halloween event was a success! New COVID regulations may influence decisions made for the event, but it is certain they will make it exciting regardless! Community involvement is very important and close to the hearts of the team's members, making the difference between a scholarly group and a scholarly COMMUNITY.

Build Team engaging in the construction of new parts

Team Development: Section Training

Each section of the team goes the extra mile to make sure all of their members are on board with the learning process. One example of this is the effort the build team is putting to explain and understand their robot in its entirety. This process is an investment in the team's future, as the younger members will take over in due time!
